Raintree Country Club

As we continue to closely monitor the coronavirus (COVID-19) situation, we wanted to reach out to you and share the actions that Raintree Country Club is taking to help mitigate any risk while you visit us. We are following guidance from local and state public health officials and government agencies including the Centers for Disease Control so we can make ongoing assessments to this ever changing situation.

The safety and well-being of our members, guests, and staff are our top priority. To that end, the cleanliness of the property and facilities is a critical point of our commitment. In addition to our regular cleaning processes, we have increased sanitization measures with particular attention to high traffic areas and frequently touched surfaces. These areas include but aren't limited to: counter-tops and door handles, golf cart steering wheels, handles, and seats. We are encouraging all members, guests, and staff to frequently wash their hands for at least 20 seconds as the CDC recommends. Lastly, we ask that staff members, members, and guests remain home if they are feeling ill with the flu, cold, or other symptoms.

We will continue to monitor the situation, reviewing updates and changes from the CDC and other agencies and post updates here as applicable. Currently Raintree Country Club golf course is fully open for business and is following CDC recommendation for social spacing.
